01 · Brand Positioning & Vision

Positioning Statement

AI-Powered Business Process Outsourcing & Technology Solutions.

Vision Statement

"To transform businesses through intelligent and future-ready AI technology."

Positioning Ratio

The entire site architecture, navigation weighting, and content hierarchy should reflect a **70/30 split** between BPO services and IT/technology services. This ratio should be visually and structurally reinforced throughout — not just stated once.

Business Process Outsourcing 70% Primary revenue driver and primary navigation item. Leads the homepage flow, gets the mega menu, and anchors the majority of service pages.	IT & Technology Services 30% Positioned as a differentiator — proof that Thinkatic is more than a traditional outsourcing vendor. Secondary nav item, appears after BPO in homepage flow.
---	--

Core Narrative for Developers

Every section on the site should reinforce one idea: Thinkatic is not a traditional labor-outsourcing vendor. It pairs trained human teams with AI, automation, and analytics to produce measurable outcomes. Copy, iconography, and layout should avoid generic "call center" visual tropes (headset stock photography, generic office stock photos) in favor of a more technical, enterprise-software aesthetic.

02 · Global UI/UX Direction

This section applies sitewide — reference it while building every page below.

Theme

Premium, modern, AI-driven corporate. The site should read closer to an enterprise SaaS product site than a traditional BPO/call-center vendor site.

Color Palette

Visual Style

- Enterprise-grade with animated, AI-inspired graphics (network nodes, subtle particle/gradient motion — not literal robot imagery)
- Glassmorphism cards for feature/stat blocks (frosted, translucent panels over gradient backgrounds)
- Clean, modern sans-serif typography with a clear type scale
- Generous white space; avoid dense, cluttered layouts typical of legacy BPO sites

Navigation

- **BPO** is the primary top-level menu item, with a full mega menu (Healthcare BPO, Customer Support, Sales & Lead Generation, Back Office, AI-Powered BPO)
- **Technology & AI** is a secondary menu item — present, but visually lighter weight than BPO, reinforcing the 70/30 positioning

Interactive Elements

- Animated statistics (count-up on scroll)
- Hover cards on service/industry tiles
- Process timelines (e.g., AI Transformation Framework)
- Client testimonial carousel/slider
- Industry icon grid
- Prominent "Book a Consultation" CTAs throughout, not just in the hero and footer

Performance & SEO

- Mobile-first responsive build
- Optimized Core Web Vitals (LCP, CLS, INP)
- Schema markup (Organization, Service, BreadcrumbList as applicable)
- Dedicated, indexable landing pages per service (not just anchor sections on one page)
- Fast-loading, compressed image and video assets; lazy-load below-the-fold media

DEV NOTE — Treat the color palette, mega-menu structure, and 70/30 weighting as binding constraints across every page in this document — they are not restated on every page but apply throughout.

03 · Hero Section

Headline

AI-Powered BPO That Delivers Business Outcomes

Subheading

Thinkatic helps global businesses accelerate growth through intelligent Business Process Outsourcing, AI-enabled customer operations, healthcare outsourcing, and enterprise technology solutions.

Whether you're looking to scale customer support, outbound sales, healthcare operations, or build AI-powered software, Thinkatic becomes your long-term growth partner.

CTA Buttons

- Primary — Book a Free Consultation
- Secondary — Explore BPO Services

DEV NOTE — Hero should use the Deep Navy → Electric Blue gradient background with subtle animated AI-inspired graphics behind the headline. The primary CTA (Book a Free Consultation) should be visually dominant (solid electric blue fill); the secondary CTA can be an outline/ghost button.

04 · Why Thinkatic + Statistics Bar

Why Thinkatic — Heading

More Than Outsourcing. We Build Intelligent Operations.

Body Copy

Traditional outsourcing focuses on manpower.

Thinkatic combines skilled professionals, artificial intelligence, automation, analytics, and enterprise technology to deliver measurable business outcomes.

We don't simply execute processes.

We optimize, automate, and continuously improve them.

DEV NOTE — This copy uses short, punchy single-line paragraphs deliberately — preserve the line breaks in the build rather than merging into one paragraph block. Consider staggered scroll-reveal animation per line.

Statistics Bar (6 items)

These are positioning statements rather than hard numeric stats — display as an icon + label strip, not a numeric counter block.

AI-Enabled Operations 24×7 Global Delivery Multi-Industry Expertise Enterprise Security Outcome-Focused Delivery Scalable Teams

05 · Business Process Outsourcing — Section Overview

The Services area is split into two weighted zones on the same "Our Services" parent page/nav group: **Section 1 — BPO (70%)** and **Section 2 — IT Services (30%)**. Section 1 contains five service pillars, each of which should ideally resolve to its own dedicated landing page (see SEO note in section 02).

Pillar	Page Ref	Service Count
Healthcare BPO	06	10 services
Customer Support	07	8 services
Sales & Lead Generation	08	8 services
Back Office Operations	09	8 services
AI-Powered BPO	10	8 solutions

DEV NOTE — Build each pillar as a card on the parent "Our Services" page (image/icon, name, one-line description, "View Services" link) that expands into its own landing page using the detailed service lists on the following pages.

06 · Healthcare BPO

Description

Support healthcare organizations through compliant, efficient, and patient-focused outsourcing solutions.

Services (10)

- Medical Call Transfer
- Lead Qualification
- Patient Outreach
- Appointment Scheduling
- Customer Support
- Back Office Processing
- Healthcare Documentation Support
- Insurance Process Support
- Revenue Cycle Assistance
- Virtual Administrative Teams

DEV NOTE — Given Thinkatic's active DME/healthcare outreach operations, this page should carry visible compliance/trust signals (e.g., data-handling and call-compliance language) near the top of the page — check with the content team before publishing final compliance claims.

07 · Customer Support

Description

Deliver exceptional customer experiences through AI-assisted support teams.

Services (8)

- Voice Support
- Email Support
- Live Chat
- WhatsApp Support
- Social Media Support
- Help Desk
- Technical Support
- Tier 1 Customer Service

08 · Sales & Lead Generation

Description

Generate qualified opportunities with intelligent outbound operations.

Services (8)

- Outbound Calling
- Appointment Setting
- Lead Qualification
- Customer Verification
- Inside Sales
- Telemarketing
- Sales Development Representatives
- Customer Surveys

09 · Back Office Operations

Description

Improve operational efficiency while reducing costs.

Services (8)

- Data Entry
- CRM Management
- Document Processing
- Virtual Assistants
- Order Processing
- Billing Support
- Quality Assurance
- Reporting

10 · AI-Powered BPO

Description

The future of outsourcing combines human expertise with intelligent automation.

Solutions (8)

- AI Voice Agents
- AI Chatbots
- Workflow Automation
- AI Quality Monitoring
- AI Agent Assist
- Intelligent Call Routing
- Process Automation
- Knowledge Management

DEV NOTE — This pillar is the visual proof point of the "AI-first" brand narrative — consider a more technical/product-style layout here (e.g., short workflow diagrams per solution) rather than a plain list.

11 · Industries & Why Businesses Choose Thinkatic

Industries (BPO Section)

Healthcare Insurance Technology SaaS Retail Finance Real Estate Education Telecommunications Logistics

DEV NOTE — Render as an icon grid with hover states (per Global UI/UX direction). Each icon can link to a filtered case-study or service view for that industry if scope allows.

Why Businesses Choose Thinkatic

- AI-first approach
- Highly trained professionals
- Enterprise-grade security
- Flexible engagement models
- Rapid team scaling
- Transparent reporting
- Continuous process improvement
- Dedicated account management
- Global delivery capabilities

DEV NOTE — Nine items — recommend a 3×3 icon-card grid rather than a plain bullet list for visual balance.

12 · IT Services (30%) — Enterprise Technology Solutions

Build intelligent digital products that solve real business problems. This is Section 2 of the Services area — visually distinct from BPO (Section 1) but consistent in component style. Five capability groups.

Artificial Intelligence

- Custom AI Solutions
- LLM Integration
- Private AI
- Generative AI
- AI Agents
- Computer Vision
- Natural Language Processing
- Machine Learning

Software Development

- Custom Software
- Enterprise Applications
- CRM Development
- ERP Solutions
- SaaS Platforms
- Web Applications
- Mobile Applications
- API Development

Cloud & DevOps

- Cloud Migration
- AWS
- Azure
- Google Cloud
- CI/CD
- Infrastructure Automation
- Monitoring
- Containerization

Automation

- Business Process Automation
- Robotic Process Automation
- Workflow Automation
- Enterprise Integration

Data & Analytics

- Business Intelligence
- Dashboards
- Data Warehousing
- Predictive Analytics
- Reporting

13 · AI Transformation Framework, Industries & Engagement Models

AI Transformation Framework

Six-stage horizontal process timeline (per Global UI/UX direction — animated on scroll).

Industries We Serve (IT Section)

- Healthcare
- Finance
- Insurance
- Retail
- Manufacturing
- Technology
- Education
- Real Estate
- Government

DEV NOTE — This industries list is distinct from the BPO section's industries list (page 11) — Manufacturing and Government appear here only; SaaS, Telecommunications and Logistics appear only in the BPO list. Keep both lists as written; do not merge them.

Engagement Models

- Dedicated Teams
- Managed Services
- Project-Based
- Outcome-Based
- Staff Augmentation

14 · Case Studies & Why Thinkatic (AI Meets Human Excellence)

Case Studies (4)

Case Study	Headline Result
Healthcare Process Optimization	Reduced processing time by 60%
Customer Support Transformation	Improved response time by 45%
AI Automation	Reduced manual work by 70%
Software Modernization	Migrated legacy systems to cloud infrastructure

DEV NOTE — Content provided is headline-level only. Each card should link to a full case-study detail page/template (problem → approach → result) once client-approved detail content is available.

Why Thinkatic — "AI Meets Human Excellence"

Businesses need more than outsourcing.

They need intelligent operations.

At Thinkatic, we combine AI technology with experienced professionals to create faster, smarter, and more scalable business processes.

15 · About Us

Heading

Building The Future Of Intelligent Business Operations

Body Copy

Thinkatic is a next-generation AI-powered BPO and technology company helping businesses transform operations through outsourcing, automation, and software innovation.

We believe technology should empower people—not replace them.

By combining operational excellence with intelligent AI solutions, we help organizations increase efficiency, reduce operational costs, improve customer experiences, and accelerate growth.

Mission To build intelligent business operations that create measurable value through people, technology, and innovation.	Vision To transform businesses through intelligent and future-ready AI technology.
---	--

Core Values (7)

- Innovation
- Integrity
- Ownership
- Customer Success
- Continuous Learning
- Speed
- Excellence

16 · Careers

Heading

Grow with Thinkatic.

Open Positions (9)

#	Role
1	Customer Support Executive
2	Healthcare Process Associate
3	Call Transfer Specialist
4	Sales Development Representative
5	AI Engineer
6	Software Developer
7	Business Analyst
8	Operations Manager
9	HR Executive

DEV NOTE — Build as a filterable/searchable job listing template driven by a simple CMS collection (title, department, location, employment type, description, apply link) rather than hardcoded — Thinkatic is actively scaling headcount and this list will change frequently.

17 · Contact

Heading

Let's Build Smarter Business Together.

Page Components

- Book a Discovery Call (calendar-scheduling integration, e.g. Calendly-style embed)
- Request a Proposal (form or link to a proposal-request flow)
- Email (click-to-mail link)
- Phone (click-to-call link)
- Office Address (Magarpatta City, Hadapsar, Pune — confirm exact address with client before publishing)
- Contact Form (name, company, email, phone, service interest, message)

DEV NOTE — Consider a split layout: contact form + scheduling widget on one side, office address/map embed on the other. Confirm final office address and phone number with the client before this page goes live.

18 · Footer

Services

- Healthcare BPO
- Customer Support
- Sales Outsourcing
- Back Office
- AI Services
- Software Development
- Automation

Company

- About
- Careers
- Blogs
- Privacy Policy
- Terms
- Contact

DEV NOTE — Footer should use the Deep Navy background with the Thinkatic logo (light/white version), and include social links and a newsletter/contact micro-form if scope allows. Blogs, Privacy Policy, and Terms link to pages not otherwise detailed in this spec — flag with the content team if they don't yet exist.

19 · Homepage Flow, Navigation & Component Checklist

Homepage Section Order

Sitemap Reference

Page / Route	Source Section(s)	Priority
/ (Homepage)	03, 04, and summarized pulls from 05–17	P0
/services/healthcare-bpo	06	P0
/services/customer-support	07	P0
/services/sales-lead-generation	08	P0
/services/back-office	09	P1
/services/ai-powered-bpo	10	P0
/technology (IT Services hub)	12, 13	P1
/case-studies	14	P1
/about	15	P0
/careers	16	P1
/contact	17	P0
/privacy-policy, /terms, /blog	18 (footer links)	P2 — content pending

Reusable Component Checklist

- Sticky header with mega menu (BPO) + standard dropdown (Technology & AI)
- Gradient hero block w/ dual CTA
- Animated stat strip
- Service pillar card (icon, title, description, link)
- Glassmorphism feature card
- Industry icon grid
- Horizontal process/framework timeline
- Case study result card
- Testimonial carousel
- Job listing card + filter bar
- Contact form + scheduling embed
- Dark footer w/ multi-column link groups
